

Making Cheshire Safer

In July 2020, Cheshire Fire Authority approved its [Integrated Risk Management Plan 2020-2024 \(IRMP\)](#). This is a multi-year plan that sets out how the Authority will provide fire and rescue services across Cheshire to address the risks we face and meet the needs of the communities we serve.

Despite the significant disruption brought about by the Covid pandemic the Authority has completed many objectives within the IRMP, which has helped to improve the services provided for the community. This has included the re-introduction of a second fire engine at Chester and the construction of an innovative carbon neutral fire station in the city; the development of new capabilities such as specialist wildfire equipment; a fleet of Rapid Response Rescue Units; a High Reach Fire Engine and a dedicated water carrier.

Alongside this, the Authority has funded the development of a state of the art operational training centre in Winsford and an extensive programme to modernise its fire stations and other properties.

The year ahead will see the Authority work to complete the remaining objectives within the IRMP. This includes the construction of a new, flagship fire station in Crewe and implementing a new shift

pattern for firefighters at Wilmslow Fire Station that will improve the effectiveness of the service by providing the area with guaranteed fire cover overnight, without the need to bring in supporting resources from elsewhere in the county. Additionally, a review of the Authority's fire prevention function will be undertaken to ensure its remain fit for purpose and meets new and emerging risks.

The coming year will also see the Authority commence a programme of activity to develop its

new 2024-2028 Community Risk Management Plan (CRMP). The CRMP will outline how the Authority will address current and emerging fire and rescue related risks over the coming years to help keep the communities of Cheshire safe from fire and other emergencies. Please visit our website www.cheshirefire.gov.uk over the course of the year to find out more information on the development of our CRMP and how you can get involved to shape the future of your fire and rescue service.
