

## Video - Fire Action Plan 2

Katie: This time, the living room door has been left open and the smoke is spreading upstairs.

Sister: \*Wake up, the smoke alarm's going off. I think there's a fire\*

Sister: \*We should tell Mum and Dad\*

Brother: \*alright\*

Sister: \*Wait there\*

Katie: Again, the girl checks the door for heat with the back of her hand.

Katie: Now the family are together, they notice that fire is spreading

Katie: out of the living room and blocking their escape route

Katie: as smoke is pouring up the stairs.

Katie: But what should they do next?

Katie: Should they:

Katie: Hide?

Katie: Go downstairs?

Katie: Or, go in the parents bedroom?

Katie: Yes, you are right!

Katie: They shouldn't go downstairs, they should crawl low in the smoke and go into a bedroom

Jack: Why should you crawl on the floor?

Katie: Because the air will be the cleanest down there.

Katie: Now the family have made it to the parents bedroom.

Katie: But what should they do next?

Katie: Should they:

Katie: Hide?

Katie: Escape through the window?

Katie: Or, go downstairs?

Katie: Yes, you are right!

Katie: When there is no other option, they should escape through the window.

Katie: If possible, try and find a window that leads to a flat roof, or the top of a bay window or garage.

Katie: The family are safe outside and one of the parents goes to a neighbors house to phone the Fire and Rescue Service.
