

Video – Escape to safety - Summary

Katie: Fire can be very dangerous but if you follow these steps you can escape to safety:

- Have a working smoke alarm
- Close all downstairs doors at night
- Have a fire action plan

In case of a fire...

- Get out
- Stay out
- Call the fire and rescue service

Well, that's about it from Jack and myself on fire safety at home.

Tell your family what you've learnt about the dangers of fire and how important it is to have a fire action plan, and a night-time routine.

If you follow the safety advice we've given you, it will greatly reduce the chances of fire in your home.

But more importantly...

Jack: ...it could save your life.

Katie: Thanks Jack!
